BENEFITS FOR ADMINISTRATION

All the key aspects and **modules** of an **administration** are encapsulated at a single platform. It can **Create, Manage,** and **Maintain** all the **Accounts, Management, Surveillance, Finance,** or any other **admin department** work and can efficiently complete their work-tasks from **Swift Education Management System**. The system has modules from admission management to HR and Payroll management all at one platform. It is beneficial for an institution to operate all the functions effectively and creates a cost-effective system.

- A comprehensive solution for each and every module of an institution.
- Administrations can manage admission process easily with the one-access digital system.
- Cost-effective metrics give better results in terms of manpower and money.
- Schedule and arrange Salary Disbursements for a heavy amount of work-force.
- Get connected to every person associated with an institution.
- Create, Maintain, and View Employee Salary slip, send Reports, Upload, and Download other documents.
- An easy way to manage Inventory for administration.
- Administration can view all types of Accounting and Financial Reports.
- Admin can assign different rights to different users.
- Complete integrated HR module with Payroll and Finance management.

BENEFITS FOR TEACHERS

It will help in creating a better relationship between **Students** and **Teachers**, which will lead to better education growth, learning, and creation. We offer **Mobile** as well as Web platform with high configurations, which can help you to design your **education structure, syllabus, and teaching methods.**

- Teachers can assign different tasks and lessons.
- Complete online attendance system (Biometric System).
- Teachers can provide everyday circulars. Thus, Parents and Students can personally check the notification on their account.
- Better features to handle multiple responsibilities on a single platform.
- Get real-time notifications of every new update.
- Get notified to the group of students/class as per convenience.
- Create, Maintain, and View student documents, also can Upload and Download Reports and Exam Results.
- Teachers can create Online Exam papers, with proper planning and scheduling of Exam Time-table also marks can be sent through SMS to parents.
- Better communication with students and parents.

BENEFITS FOR STUDENTS

Students are the key element of every educational institute. They are learners and attends an educational institution, which gives them constant knowledge and ambition to achieve the heights of success. And to consider this fact, We have developed the system which can simplify and digitalize the whole operation management of Institutions. With the help of **Swift Education Management System**, we have built the structure that the young generation will easily understand and students can implement it in their daily educational life. Digital integration gives more smart features to the users that are highly comfortable to work with and maintain.

- Simple architecture and easy to understand for students.
- Tracking and monitoring of records for every single entity.
- Get daily notifications of every new update.
- Unique Id and Password for every user.
- Manage tasks, leaves, events at a single platform.
- View attendance, assignments, homework, exam/test marks or everyday routine.
- Admin can assign different rights to different users.
- Better mobility for Administrations, Teachers, Students, and Parents.

FREQUENTLY ASKED QUESTIONS

Q1 Do you guys offer customization services if I want to add or remove some things from the software.

Ans We know that each and every school or college is different from each other in their system and process. Swift Education Management System is engineered to be customization friendly so we do offer customization services in order to meet your needs.

Q2 Do you have any plans in future to update your application and add more modules?

Ans Yes we are updating and making our Education Management System more efficient as the needs of clients are constantly changing, so you need a system that is flexible to meet future needs. Cloud systems can efficiently adapt to changing environments by adding new technologies, and new functionalities, and rapidly making them available to clients.

Q3 Is your system durable and scalable as I have X-amount of students, staff and data?

Ans Scalability or Durability is highly important for any system. Swift EMS is capable of growing with the institute, both in terms of slow managed growth and sudden change. As the Swift Education Management System is developed for cloud architecture, cloud-based solutions are designed to scale seamlessly for large numbers of simultaneous users. As such, they are able to easily maintain performance levels and uptime as your organization grows and the volume of data stored expands over time.

Q4 What if there are any bugs and errors in the application?

Ans Scalability also requires consistency or reliability. Swift EMS is capable of dealing gracefully with errors, not stopping at the first sign of trouble. Moreover, it is easy to separately monitor the presence and performance of each component of the system, in order that support staff can identify and deal with any errors or overload that does occur.

Q5 Is your system secured enough will my data be lost or stolen?

Ans Security is also highly important for any system. Swift EMS satisfies all current web security standards. The drawback of making it easy to find school information is that it also makes it easy for this information to fall into the wrong hands. Defined security lines are implemented right from the beginning of Swift EMS development. Swift EMS has the concept of user-level permissions/rights. PINs are stored in the database using a standard encryption algorithm. Also our Support staff is continuously monitoring the systems for any possible breaches and fixing them before it occurs in real environment.

Q6 Do I need to implement any kind of large infrastructure or hardware to use Swift EMS?

Ans When using Swift EMS as a service, the customer does not have to make large upfront investments in hardware, operating systems, databases, software licenses, IT staff, and ongoing overhead costs. It requires no client-owned or managed infrastructure other than Internet access, PC, Mobile Phones and can be entirely supported on an infrastructure provided by the Logic Saint.

Q7 How much time is required to implement Swift EMS in my Institution?

Ans Since no installation of on-site hardware or software is required in SaaS, implementation can start immediately, meaning customers can start realizing benefits right away with limited upfront costs, rather than spending months deploying a client-server solution.

Q8 Is there any demo available for the software?

Ans Yes we are offering 2 months demo to utilize the benefits of Swift EMS in order to understand and use the application so that you can decide whether you need our system or not kindly contact us and provide all the required information in order to get your demo license of 2 months for free.

Q9 Do you provide any kind of support and trainings?

Ans Yes we do provide support and trainings for you and your staff as well so they can easily use the system without any problems, we provide in-house trainings and online support and trainings as well.
